

Te Whatu Ora Health New Zealand

Process on when to use the 48-hour standdown guidance for gastroenteritis symptoms in ELS

Do you have a child/staff member with vomiting or diarrhoea (3 x loose bowel motions)?

No need to exclude them.

Is there more than one child or staff member with vomiting and/or diarrhoea?

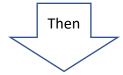

Exclude the child/staff member until they have been free from symptoms for 48 hours.

Be alert for more cases over the coming days.

Exclude those children and staff until they have been free from symptoms for 48 hours.

Contact Toi Te Ora Public Health on 0800 221 555 to report an outbreak of gastroenteritis. We can provide advice and support to control the spread of disease.
